Wilderness Explorer
Junior Ranger Activities and Adventures for Ages 8 and up
WELCOME TO WILDERNESS

This activity booklet is designed for exploring wilderness, either at a federally-designated Wilderness Area you are visiting, a Wilderness Area you would like to visit, or a wild place near your home. Activities are geared for ages 8 and up, so look for the bear paw and choose the activities that are right for you.

Ask a Wilderness Ranger! As you explore, you may find it helpful to ask for help. You and an adult can also look for information on the internet. Here are five great websites to learn more about wilderness:

- Wilderness Connect  www.wilderness.net
- Forest Service  www.fs.fed.us/managing-land/wilderness
- National Park Service  www.nps.gov/wilderness
- U.S. Fish and Wildlife Service  www.fws.gov/refuges/whm/wilderness.html

Answers to many of the activities and questions can be found on page 21.

SPECIAL PLACES

Draw or describe a place that is SPECIAL to you in this space.

What does the word WILD make you think of? Draw or describe it here.
Ask 3 people what they think “wilderness” is. Record their responses here.

1. Person interviewed: __________________________
   
   Wilderness is...

   Example: A. a home for wild animals  
   B. a quiet place to think  
   C. a place to be free  
   D. your idea

2. Person interviewed: __________________________
   
   Wilderness is...

3. Person interviewed (could be a wilderness volunteer or ranger):
   
   __________________________

   Wilderness is...
TWO KINDS OF WILDERNESS

WILDERNESS is an area that is ... wild.

There are two kinds of wilderness. One kind of wilderness can be any natural area near you - wild places like a grassy hill, pond, river, or beach. The second kind of wilderness is described in the 1964 Wilderness Act and these places are called “Wilderness Areas” - lands and waters on federal public land that are protected.

Complete the following description to learn more about the federally-designated Wilderness Areas referenced above, by using these words to fill in the blanks:

will controlled free nature cut changed

In Wilderness Areas, nature follows its own ______________. The animals aren’t ______________. The trees are not ______________. The rivers run ______________, without dams. Visitors enjoy being in ______________ as it was before modern humans __________ it.

Native American cultures believe that all land ought to be respected, and may not view wilderness as a separate idea.

What does wilderness mean to you? Use the space below to capture your ideas with words and/or pictures.
Wilderness Explorers need to know how to be safe when they’re exploring the wilderness. Being safe in wilderness begins before you start your trip.

- Always go with another person.
- Check the weather and conditions for the area you are visiting.
- Tell someone who is staying behind exactly where you are going and when you plan to return.

1. There are “10 essentials” you and your adult should have with you to be safe and prepared for emergencies. A box is drawn around each essential item. Write the name of each item on the list.

2. What else would you like to bring? Circle the items below. Don’t make your pack too heavy!
Using the map at the right, find the answers:

Draw or name something you would find in a Wilderness Area in Alaska.

1. Which Wilderness Area is furthest from you?
2. Which state has the greatest number of Wilderness Areas?
3. Six states have no Wilderness Areas. Name them here:

Draw or name something you would find in a Wilderness Area in Hawaii.

Ask a Wilderness Ranger (or visit wilderness.net):

How big is the Wilderness Area nearest you?
5. Using the ruler below (cut it out if needed), estimate the distance between the two Wilderness Areas: ________ miles.

6. Suppose that you and your family could drive from one to the other at 60 miles per hour (mph). How long would it take to get there?
   Hint: distance _____ (miles) \div speed _____ (mph) = time _____ (hours).

7. What might you find that is different between the two Wilderness Areas?

8. Which Wilderness Area named below is closest to:
   - New York City? _________________________
   - Phoenix? _________________________
   - New Orleans? _________________________

The names on the map below are just a few of the Wilderness Areas in the United States.
(The number is the total number of Wilderness Areas in that state)
Look around a Wilderness Area or other natural area you think of as wild and consider these questions (ask a Wilderness Ranger (or check the internet) for help):

1. What people lived here before the Europeans came?

2. Did these people live in villages or did they move their homes to follow and hunt animals? Draw a picture of where they might have lived below:

3. What things might these people have eaten (such as roots, berries, buffalo)? List or draw a picture below:

4. Do these people or their descendants still live here or near here?

Important: If you find any arrowheads, pieces of pottery, or other old objects be sure to leave them where you found them so that archaeologists can reconstruct history!

Answer the first four questions, plus:

5. Did these people have names for any of the natural features such as mountains, rivers, or valleys? Write down the name of one of the features here:

6. Is this name different than the one on the area map?

How can you be a responsible Wilderness Explorer? The Seven Principles of Leave No Trace are a good starting place:

1. Plan ahead and prepare
2. Travel and camp on durable surfaces
3. Dispose of waste properly
4. Leave what you find
5. Minimize campfire impacts
6. Respect wildlife
7. Be considerate of other visitors

Go through the maze on the next page and apply these principles.

Help Leave No Trace on your public lands!

- Pick up three pieces of litter and put them in the trash.
- Pick up a bag of litter. Separate and recycle as many items as possible. Put the remainder in the trash.

RECYCLING is better for the Earth than putting things in a landfill, but it still takes a lot of energy to recycle.

REUSE is even better for the Earth. Refill your water bottle and conserve the Earth’s resources.

Just for fun, decorate and color the water bottle in this book.

To learn more about Leave No Trace visit www.LNT.org
These Wilderness Explorers are about to go on a trip through a Wilderness Area. Help them make the best choices about where to go and what to do along the way. Each stop has a numerical rating with it. Add up your score & find your impact level on page 21.

Wilderness Areas can be places where scientists can go to understand plants, animals, and landscapes that are in a more natural state, less affected by human activities.

As a scientist, you will ask a question, make a prediction (called a hypothesis), and test your hypothesis by observing the thing you asked a question about.

1. Go outside and find a plant or animal to observe. Describe it here with words and/or pictures:

2. Come up with a question about it. For example, what does this bird eat? Does this plant prefer to live in dry soil or wet?

3. Make a hypothesis. This is an “educated guess” about the answer to your question. For example, I think that the bird eats …”

4. Think about and describe how you could test your hypothesis. If it is possible to test the hypothesis by making observations, then do so. If not, think about what kinds of observations you can make. For example, “I will observe the bird and see what it eats…”

5. Write down your observations here.
6. Do you think the animal or plant you observed was affected by people being nearby? If so, how?

Complete the six previous questions, plus...

7. What kinds of research are going on in the wilderness you are visiting or studying?

8. Develop a hypothesis that would best be tested both inside and outside of wilderness. Why would it be important to compare observations inside and outside of wilderness?
WHAT CAN YOU DO...

In this picture, put an “X” through the things that you think DON’T belong in Wilderness Areas.

Color the things that you think DO belong in Wilderness Areas.
IN WILDERNESS AREAS?

Draw yourself doing something that YOU would like to do in a Wilderness Areas.
The best way to learn about wilderness is to get out and explore it! Find out where the nearest Wilderness Area is, and go explore with your family. If you are unable to go to a Wilderness Area, find a place that is away from developments (like roads and buildings). Make sure you complete the “Wilderness Safety” activity before you head out.

Use ALL of your senses. Find a quiet place to sit for five minutes - describe in words or pictures what you:

**See**

**Hear**

**Smell**

**Feel**

*Most importantly, have fun!*
When you get back home, think about what you would tell a friend about your wilderness experience. Be creative! You can write a story or poem, draw a picture, or perhaps make up a song or play. Your notes from page 16 may help you get started. Use the space below to organize your ideas using words and/or pictures.
Wander through time and history to explore the idea of wilderness by reading the information in the timetable below.

</table>

1. Wild Word Scramble: Find the one bold and underlined letter in each quote, and write them here:

   Now unscramble the letters to form a special word in The Wilderness Act (hint: see the quote from The Wilderness Act on page 4).

   1. “We have forgotten how to be good guests, how to walk lightly on the earth as its other creatures do.” - Barbara Ward, 1972
   2. “I hope the United States of America is not so rich that she can afford to let these wildernesses pass by, or so poor she cannot afford to keep them.” - Margaret (Mardy) Murie, Conservationist, 1980

2. What significant event in the history of wilderness occurred in 1964?

   1964: The Wilderness Act was signed into law.

3. How do you think society’s thoughts about wilderness have changed over time?

   Over time, society has come to appreciate and value wilderness more, recognizing its importance for biodiversity, recreation, and spiritual well-being. The idea of preserving wilderness as a public trust for future generations has become more widely accepted.
Many plants and animals have been moved from one side of the world to another for food, farming, hunting, and sometimes by accident (like hitching a ride on a boat). Sometimes these plants and animals (called “invasive”) escape and have big effects on natural systems and change wild places.

An example is buffelgrass, a South African plant that is invading the Saguaro Wilderness. Buffelgrass easily catches fire. It pushes out the native plants including saguaro cacti. An area of buffelgrass can double every year.

1. Use the table below to calculate how many years it would take for buffelgrass to push out saguaro cacti in this simplified model of the ecosystem. In year 1, buffelgrass occupies one square (B) and the rest are occupied by saguaros (S). In year two, put a B in two times as many squares, and put an S in remaining squares. Continue to double the amount of buffelgrass each year. In what year is there no more room for saguaro cacti? ____________

2. Why does this matter?

Ask a Wilderness Ranger (or check the internet):

What is the name of an invasive plant or animal that affects the Wilderness Area you are visiting or a wild place near where you live? How does it affect the wilderness?
For these activities, there is no “right” answer. Check the ones you have completed.

Pages 18-19, Wild Words
1. UNTRAMMELED
2. President Lyndon Johnson signed The Wilderness Act.
Other question—many answers

Pages 14-16, What Can You Do in Wilderness?
Everything in the picture belongs, except: road, store, jeep, all-terrain vehicle (ATV), cell tower, power line, jet ski and the mountain bike. To learn why, check the definition of Wilderness on page 4. If this is a mountain forest, the palm tree does not belong. The garden gnome? Now that's just silly.

Pages 20, Raiders of the Wild
1. The buffelgrass replaces all of the saguaro cacti in year 5.
Other question—many answers

CREDITS: Originally produced by the National Park Service Intermountain Region, adapted by the Bureau of Land Management, Forest Service and U.S. Fish and Wildlife Service. The USDA and DOI are an equal opportunity provider and employer.
Make a window frame by following the directions on the next page.
Now go outside.

1. Use the window to frame a view where you can see things made by people, such as a road or a building. Draw or describe the view in box # 1 below.

2. Use the window to frame a view where you can’t see anything made by people. Draw or describe the view in box # 2 below.

3. In which window do you think you would be more likely to see wildlife?

4. What did you like in each window? What did you not like?
Cut or tear out this post card along the dotted lines.

• Use this page with the hole as a frame for the activity on page 22.
• Save the post card—draw a picture on the other side about your wilderness visit and mail it to a friend.

Having a Wild Time...
